

Summary of Design process to date:

I still have design issues to resolve but it's coming together. I had to create a "Specials" table to meet the required 8 tables. I'm going to continue to find another one. I included 5 options each for repairs and parts but realize there could be more or less than these. I also plan to include drop-down boxes for repairs/parts used often. I also need to help Bishop Malungahu determine how he wishes to gauge ethnic background and income level.
